### **DETAILED ACTION**

Acknowledgment is made of the receipt and entry of the amendment filed on December 10, 2008.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Any rejection or objection not repeated herein is withdrawn.

**Claims 1-32 are under examination.**

### ***Response to Arguments***

#### ***Claim Rejections - 35 USC § 112***

Claims 1-32, as amended, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Newly applied.

Claim 1 recites the limitation "the total dried standardized extract" in line 4. There is insufficient antecedent basis for this limitation in the claim.

All other cited claims depend directly or indirectly from rejected claims and are, therefore, also, rejected under U.S.C. 112, second paragraph for the reasons set forth above.

Art Unit: 1655

***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Applicant argues that the subject matter of Claims 1 and 23-27 herein is not the same subject matter of claims 18 and 21-23 of U. S. Patent No. 6,649,150 B2.

Applicant argues that the claims of the present application encompass formulations which contain the claim-designated components as a powder in addition to a physical form other than a powder, such as suspensions disclosed in the specification.

Applicant's arguments have been fully considered but they are not persuasive.

Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Thus, Claim 1, as amended, and Claims 23-27 is/remain rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 18 and 21-23 of prior U.S. Patent No. 6,649,150 B2. This is a double patenting rejection.

Art Unit: 1655

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Again, Applicant argues the subject matter of the claims in U. S. Patent No. 6,649,150 B2 is directed to powders whereas the claims herein are not restricted to such a physical state. Applicant’s arguments have been fully considered but they are deemed persuasive. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Thus, Claims 1-7, 10-13 and 15-27, as amended, remain rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-17, 19 and 20 of U.S. Patent No. 6,649,150 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are obvious variants of one another.

Art Unit: 1655

Applicant argues that there is not basis for the rejection herein because the methods of the '509 patent were found to patentably distinct from the powder compositions and methods claimed in the '150 patent. Applicant's arguments have been fully considered but they are not persuasive. Thus, Claims 11 and 14 remain rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,696,509 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are obvious variants of one another.
